## History/Case Presentation

This patient always had a pleasant smile, yet she still longed for a more uniform look. At her young age, she did not want to destroy her tooth structure to make room for traditional veneers. She desired a safe, less invasive way to perfect and whiten her smile. When she heard about Lumineers as a quick and pain-free fix, she knew they were the right choice for her.

## Patient Testimony

"I had discolored teeth and I wanted a bigger, broader smile. I am aware of the process for traditional veneers but didn't want to destroy my natural tooth structure. I saw the beautiful results of Lumineers and couldn't wait to get them done myself. This procedure is definitely the most pleasant dental experience I have ever had. Lumineers have changed my life dramatically and now I can smile with confidence!" —L.C.

## History/Case Presentation

This patient disliked the large gaps in her smile. She felt her teeth looked too child-like, and she desired a more sophisticated look. She considered orthodontics to close the large spaces, but the time and pain involved made her decide against the treatment. She was skeptical when she heard that Lumineers could instantly align and permanently whiten her smile without shots or pain. After seeing several before and after portraits of Lumineers patients, she was excited to finally perfect her own smile.

## Patient Testimony

"The large gap in the front of my smile made me look like a little girl. I wanted a seamless, straight smile, but when I saw horror pictures of patients' teeth ground down to pegs, I did not understand why anyone would want traditional veneers. I could not believe what a dramatic difference Lumineers did for my smile—within one hour, the large space was closed and my teeth were all a proportionate size. The best part was that I experienced no pain. I am amazed at the difference in the way I carry myself—I look more mature and feel better than ever!" —K.J.

## History/Case Presentation

This patient had received top-notch dental care for many years, yet his smile remained an embarrassment for him. His dentist provided the finest, time proven restorations, but could not create a smile for his shy patient. He offered to place traditional veneers, but this patient declined because he did not want to endure the painful and destructive process of tooth reduction. This patient was also offered orthodontics, but when he was told that it would take almost two years to just align his teeth, he declined because of the embarrassment and pain that it would have involved. He decided to go to a Lumineers dentist, where his smile could be both aligned and permanently whitened in less than two hours and without any pain.

## Patient Testimony

"I had a missing tooth in front, a large space, and rounded front teeth. I have been told by people throughout my life to get braces or veneers, but never wanted to go through the pain or years of treatment. I have always grown my mustache over my teeth to hide them. I was amazed to hear that Lumineers could improve even the problems that I had with my smile without injections or tooth reduction. I am so glad that I did not give in to the invasive procedures offered to me in the past. It is such an incredible feeling to finally smile big for the first time in my life!" —R.K.

## History/Case Presentation

This patient had misaligned teeth and was unhappy with her smile. Being fearful of the dentist she could not imagine going through the painful grinding that would be required of traditional veneers. When she saw a commercial on television for Lumineers, she immediately knew that this would be the pain-free way to correct her smile.

## Patient Testimony

"I wanted to correct my smile, but also keep my existing teeth in case I didn't like the results. With Lumineers, you have the option of reversibility, but with traditional veneers, your tooth structure is gone forever. There was absolutely no pain with the placement of my Lumineers—I wanted to laugh it was so easy. With Lumineers, I have a better smile than I ever could have imagined." —J.L.

## Patient Testimony

"My smile was dark and I had a diastema between my centrals. I always wanted to improve my smile and go whiter, but wasn't willing to go through the painful process of traditional veneers. Lumineers has been proven for a long period of time and if I am going to recommend Lumineers to my patients, I wanted to have it done myself. I am getting compliments about how much younger I look with my Lumineers smile!" —M.S.

## History/Case Presentation

As a practicing dentist, this patient was self-conscious of the space between his teeth and overall discoloration. Throughout the years, he has been familiar with the success stories of Lumineers and is very impressed with the fact that Cerinate porcelain has been proven to last over 20 years. He felt Lumineers were the best option to permanently whiten his smile and close his diastema, painlessly and conservatively.

## History/Case Presentation

Ashley, a 28-year-old female presented to the office. Her chief complaint was her smile, or in her words, the lack of "showing teeth" when smiling. In addition, she didn't like the quality of the teeth that did show.

### Treatment Plan:

- Whitening with Lumibrite
- Gingivoplasty with SOL diode laser
- 8 Lumineers from #5 – 12 with minor enamel contouring and no temporaries

The patient accepted a comprehensive treatment plan over a 4-week period.

BEFORE

## History/Case Presentation

The patient was self-conscious about her smile. Her dentist told her it would take five years of braces and retainers to straighten her teeth. Being a dental phobic, she did not want traditional veneers due to the painful process, the fear of having her teeth ground down, and the possibility of not liking them.
